Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on November 10, 2010 has been entered.

Detailed Action

This office action is a response to applicant's information disclosure statements submitted November 10, 2010, November 29, 2010, and December 15, 2010. This application is a national stage application of PCT/GB04/03932, filed September 15, 2004.

Claims 1-3, 6-8, 10, 11, 13-25, and 30-50 are pending in this application.

Claims 1-3, 6-8, 10, 11, 13-25, and 30-50 as amended are examined on the merits herein.

Information Disclosure Statement

US pre-grant publication 2007/065373, which is document A01 cited in the information disclosure statement submitted November 29, 2010, is the pre-grant publication of the present application 10/571184. It is therefore not a relevant prior art

document and should not be cited in an information disclosure statement or listed on the front of any patent issuing from this application. Therefore it has not been considered.

Reasons for Allowance

Applicant's information disclosure statements, submitted November 10, 2010, November 29, 2010, and December 15, 2010, have been fully considered and not found to be the basis for any new grounds of rejection against the claims as previously allowed in the office action of July 28, 2010. Specifically, the previously cited reference WO97/03649, as well as US patent 6475523 which is cited in the present information disclosure statement, discloses inhalable compositions of leucine and budesonide, but indicates that the respirable fraction of said powders decreases as the concentration of leucine is increased above 1%. Furthermore US patent 6989155 (cited in PTO-1449) also discloses dry powder compositions of salbutamol and leucine (column 13 table 4) and comes to a similar conclusion that for this active agent increasing the amount of leucine above 1% decreases the respirable fraction. By contrast, as discussed in the previous notice of allowance, according to table 2 on p. 45 of the instant specification, for combinations of heparin and leucine, increasing the amount of leucine above 1% increases the fine particle fraction, which one of ordinary skill in the art would consider to be indicative of an increase in the respirable fraction. In view of the results obtained in the prior art for budesonide and salbutamol, this effect observed with heparin-containing dry powders is surprising and unexpected.

While US patent 6858199 (cited in PTO-1449) generally discloses dry powders having a high fraction of fine particles, column 3 line 24 - column 4 line 17) it does not specifically disclose a composition of heparin and at least 2% leucine. Heparin is mentioned as a possible therapeutic agent to be included in the composition in column 6 line 9, and leucine in column 13 line 41, with a general suggestion that amino acids are preferably added as 20-80% by weight, but they are both mentioned among laundry lists of active ingredients and additives with no particular teaching directed toward the specific combination of heparin and leucine. Furthermore, although leucine is mentioned as a possible additive there is no indication that one of ordinary skill in the art would expect these high concentrations of leucine when added to heparin to actually improve the fine particle fraction of the powder, rather than acting as a carrier, bulking, agent, or other generic pharmaceutical excipient. Therefore any *prima facie* case of obviousness based on this reference would be overcome by the aforementioned finding of unexpected results.

Additionally, US pre-grant publications 2003/0166509 and 2005/0013867 (cited in PTO-1449) also mention both leucine and heparin in passing but do not provide any indication of the unexpected results discovered by Applicant.

For these reasons no new grounds of rejection are introduced against the previously allowed claims in view of the new references cited by Applicant. The claims are deemed to be allowable for the same reasons previously made of record in the office actions submitted July 28, 2010 and October 22, 2010.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled, "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Eric S. Olson whose telephone number is 571-272-9051. The examiner can normally be reached on Monday-Friday, 8:30-5:00.
